

HORIZON

DIGITALLY ENHANCED
CAMPUS

Who We Are

Horizon: Digitally Enhanced Campus is an online learning platform owned and operated by the State of Oklahoma. It pairs the best of on-campus learning, including social development, extracurricular activities and one-on-one instruction from high-quality teachers, with a robust online curriculum to better tailor instruction to students' learning needs and interests.

Our Pillars

Accessibility

Every student deserves equal access to opportunity. Horizon empowers Oklahoma school districts of all sizes to provide the best opportunities and guarantee that no student is limited by their location. Our innovative blended learning model nurtures each student's potential, while keeping them firmly connected and integrated in their local school district.

Affordability

At no cost to school districts, Horizon offers over 20 free online AP classes taught by dedicated teachers and provides professional development to educators. Through the Horizon Consortium, school districts also gain access to our full course catalog at the lowest rates in the United States along with discounts on administration of Learning Management Systems.

Innovation

We deliver course offerings not typically available in traditional schools, especially smaller and rural districts. This allows students to pursue personal learning goals, whether it's credit recovery, college readiness or gaining hands-on experience for exciting career opportunities — all while still in high school.

Quality

Our growing Oklahoma Online Course Catalog offers hundreds of subjects, including STEM, 3D modeling, Criminology and AP courses. This curriculum aligns with state and national academic standards, and our students consistently earn high pass rates on our AP courses.

Partnership

We help school districts maintain their existing partnerships with trusted third-party vendors AND save them money. By working together, we optimize taxpayer dollars and create brighter horizons for all students, families and communities.

District Testimonials

"We appreciate the reduced costs that allow us to serve more students. This is a great network and very supportive of our Virtual Education initiatives!"

"I think the ability for our students to take an online class or classes is valuable in high school as it prepares them more for independent learning now, post-secondary and in their careers. I am grateful that our students have this as an option to learn."

"This is a great way to have access to AP courses for your students! We appreciate the opportunity to participate."

"Horizon has allowed our district to be more flexible with student course scheduling. It has also allowed transfer students who were behind to successfully catch up on credits."

"I oversee a consortium with 33-38 districts depending on the year, with most of them being small rural districts. This partnership with Horizon has helped us keep their costs down, and we have actually been able to cut their costs and increase their resources. This benefits districts, instructors and educators, which is a huge win for all!"

Student Testimonials

"The teacher was a great and I hope she teaches other people the way she taught me!"

"The teachers are incredible, and the almost immediate positive responses are always very helpful and constructive."
